

Medium Lights

Applies to

- Events that require dynamic, atmospheric lighting, e.g. : to illuminate a booth, a medium-sized stage, etc.
- Dancing parties
- Weddings

Description

Standard, this package includes the following four fixtures :

- 2 professional, LED *wash*-type moving heads, which can take any color you like. Their low consumption allows you to plug them into practically any normal building electrical installation.
- 2 professional, LED *spot*-type moving heads. Their low consumption allows you to plug them into practically any normal building electrical installation.

The package also includes a fog machine, as well as two elegant, vertical, aluminium structures (3 mts high) to hang the different fixtures.

Finally, a light programmer/operator is also included in order to configure the system exactly according to your requirements (movements, colors, intensity, speed, effects, etc.)

Optionally, we propose to double the equipment to increase the total light output.

Tip : the two *spot*-type moving heads can receive so-called gobos. Gobos are small metal or glass discs (as shown on the illustration on the left), which can be placed inside the fixture. Gobos can contain standard patterns or a specific logo, to be projected on a wall, a ceiling, the dancefloor, etc. If you're interested to know more about this feature, don't hesitate to contact us.
